Response to Office Action

Jerome Jackson, Jr. GAU 2815

Serial No. 09/939,339

over said chip in said well.

Claim 77 (previously submitted).

A device as recited in claim 66 further comprising a coating

over said chip in said well.

Claim 78 (previously submitted).

A device as recited in claim 66 further comprising a

transparent material located in said well and covering said chip, said transparent material being

capable of converting monochromatic light emitted by said chip to white light.

<u>REMARKS</u>

Claims 55 and 66 have been amended to recite the use of a plurality of mounting panels on the

secondary heat sink on which primary heat sinks and semiconductor chips may be mounted to

emit light in a desired direction. This limitation is not found in the prior art and should overcome

the obviousness rejection.

Claim 66 has also been amended to recite a heat-dissipating air passageway in the secondary

heat sink. The prior art does not disclose the recited limitation, so this amendment should

overcome the obviousness rejection for claim 66 and those claims which depend on it.

Applicant believes the case is now in condition for allowance. If any additional fees are due

those fees should be charged to Deposit Account No. 50-0581.

Respectfully submitted this 10th day of November, 2004.
